Upper Molars. Festooned jaws conform to the gum line and provide stability.

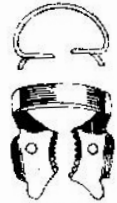

3220

For molar roots and partially erupted or irregularly-shaped smaller molars. Jaws have a four-point contact at the corners. Also useful as a Pedodontic molar clamp.

3221

Right and Left Molars. Particularly well-suited for third molars, but also useful for all lower molars. Serrated jaws. Offset jaw height provides stability over a wide range of conditions, including partially-erupted teeth.

3222

3223

For partially-erupted or irregularly-shaped molars. Jaws are festooned for stable grip.

3224

Large molar clamp. For large partially-erupted or irregularly-shaped molars. Jaws are deeply festooned and have a four-point contact at the corners.

3225

Lower Molars. General purpose clamp. Flat jaws avoid gum impingement.

3226

Upper Molars. Similar to No. 200, but with slightly more rounded jaws. Festooned jaws conform to gum line curvature and provide stability.
